16x20	\$33.68

Disclaimer: We will not scan or reproduce any professional photos or artwork without permission from the photographer or artist.

- Artwork that is highly textured, three-dimensional, metallic, fluorescent, or extremely glossy can usually be digitized, but will require extra time. In some cases it may be better to photograph the piece with a digital camera, which will be priced the same as scanning.

Bulk Scanning of Prints	
<i>**Price includes scanning to disc only, if images need to be rotated, kept in order, color corrected, etc. see next page for additional charge.</i>	
<i># of prints</i>	<i>total price (including CD or DVD)</i>
up to 49	\$25.25 minimum
50 - 99	\$41.99
100 - 199	\$62.99
200 - 500	\$104.95
500 -700	\$146.99
700+	.20 per each additional photo

- Size limitations: No smaller than wallet, no larger than 8.5x11
- Photos cannot be mounted/torn/bent or left in albums/sleeves
- If needed in specific order, customer must sort accordingly
- Additional charge for cropping \$2.00 per photo.

Bulk Scanning-Additional Options

- 1. Resolution of scan.** The price we have is for 300dpi scan. If we go higher dpi such as 600 dpi, file sizes become larger and scanning is much slower. We need to have a separate price for higher res. bulk scan. If photos are small and a customer wants to use scanned images for a slide show or printing larger photos, we need to use higher res. Scan. **There will be an additional charge of 10% for 450dpi, 25% for 600dpi, and 50% 1200dpi.**
- 2. The quality of the scan.** The quality is not bad for reproduction or slide show. But bulk scan is inferior to a flatbed scan. We view each image and crop and enhance scanned image individually when we do flatbed scan. We do not crop or enhance scanned images with bulk scan.
- 3. The size limitation.** The bulk scan can be done for the width between 3" and 8". Anything wider or narrower cannot be done on bulk scan. We need to separate those pictures which are too narrow or too wide at the time of order for Aladdin scan. If they need to be in order, the sequence number should be penciled in the back of each photo.
- 4. Mounted photos.** The bulk scan does not work with mounted photos. Those need to be separated from the rest for flatbed scanning.
- 5. Keeping in order.** If the order of photos is important, sequence number needs to be penciled in the back of each photo. Otherwise, we cannot guarantee to keep them in order but it is more than likely they will be in order. There will be additional charge for keeping them in order as in the price list if they give us sequence number. If they are not numbered in the back, we will try to keep them in order as much as possible without additional charge. There will be a cost of \$0.10 per photo to keep prints in order.
- 6. Keeping the orientation of photos.** If a customer would like to have images turned right side up, we have to charge for the service as in the price list. Simply turning photos right side up does not help. **The cost is \$10.00 per 200 photos.** This is something that must be done after the images are scanned. Rotating the images before they are scanned will not prevent a rotation charge.
- 7. Creating separate folder for each envelop or divider.** We can create separate folder for each envelop or division of photos. We can name each folder according to the description on envelops or dividers. **The charge is \$1.00 for each folder that we create.**
- 8. Color correction.** If we need to color correct each image, we need to charge for the service as in the pricelist. **Color correction is \$50 per every 500 photos.**

Giclée / Fine Art Reproductions

We have the ability to reproduce paintings, drawings, and other two-dimensional artwork. The artwork is scanned to create a high resolution file, which is then color-corrected to match the original. In order to match the color as accurately as possible, we must have the artwork here throughout the process. For specific pricing, see flatbed & oversized scanning sections. See watercolor and canvas sections for print pricing. Color-correcting is only included if prints are ordered with scanning.

- CDs ordered at the time of scanning are \$6.95.
- 2-4 weeks is the normal turnaround time.
- Custom sizes available - call or e-mail for price quote.
- Product comes with spacer blocks attached to the back and a wire for hanging on the wall.

Package Prints

Package prints are assorted sizes of the same image printed on a sheet of paper. We print package prints on glossy or matte paper from any digital file or negative (120, 35mm, or APS).

You can bring in your image files on a CD or place an online order. Turnaround time is normally a week but may take longer depending on the size of the order. Refer to the [Resolution Guide](#) for proper image file sizes. Digital images should be in 8-bits/channel mode with RGB color. The file type should be JPG or TIFF in IBM PC byte order.

Image handling fee: (Applicable when not every negative or digital image is selected to be printed.)

Add \$1.00 per negative and \$.50 per digital images.

Minimum order: 25 units. Orders of less than 25 units will be priced at the regular enlargement order price.

Placing Package Print Order:

1. Download "Package Print Order Form" from [File Library](#) .
2. Define your own package definitions on the form.
3. Specify the desired surface (Matte or Glossy). We use Luster finish for all Matte finish orders. Refer to [File Library](#) for available paper types.
4. Send your negatives or digital files to us with the order form. For digital files, you may use [e-mail](#) , [FTP](#) or our [Digital Drop Box](#) .
